

# Out and about

When you are in a garden, out and about on a nature walk, at the park, walking the dog, or maybe having a walk in the woods, there are lots of things to see.

Here is a leaf collecting activity for you to do, the next time you are outside playing or going for a walk.

# Collecting leaves for leaf threading

1. Find and collect lots of different size and coloured leaves.

2. Find a small stick or twig that you can use to push or thread through your leaves.

3. Find some thin string or coloured wool or even ribbon and wrap it tightly around the stick.

4. Make a knot at the end of the string and thread the sharpest end of the stick through the leaf.

You are now leaf

threading!
