

LET'S INVESTIGATE

By Sarah and Esther

STEP 1

For this experiment you will need:

- Baking powder
- White vinegar
- Plastic cup
- 1 Rubber glove

STEP 2

- Add 4 teaspoons of baking powder into the rubber glove.

STEP 3

- Fill the cup up a 1/3 of the way with the white vinegar

STEP 4

- Now it's your turn, what do you think will happen?
- Watch the video to see how to mix the baking powder and vinegar together...

FUN SCIENCE FACTS!

- When the baking powder is poured into the vinegar, a chemical reaction occurs. Gas bubbles are made, which rise and fill the glove with air, causing it to inflate!
